E0017 ~ Aluminium 1; 2; 2 1/2; 3; 3 1/2.

E0015 ~ Pastic bakelite. 1 1/2; 2; 3; 3 1/2; 4.

E0010 ~ All plastic double lens. 10X, 12X, 14X.

M0075

The microscope body is the heart of stereo design. It contains the objectives and prisms that capture the image of the specimen. Turret stereo bodies allow the viewer to change from one magnification to another by rotating the turret. While not as flexible as a zoom stereo body, turret bodies are more economical. Eyepiece WF10X

Objective turret rotated manually 1-4X.
 Illuminator: Incident lighting & transmitted lighting.

M0076

Modular zoom stereo microscope. Offering a more flexible and wider range of magnification than turret bodies. Zoom objectives increase and decrease magnification progressively, causing the specimen to grow or shrink smoothly in the eyes of the viewer. Eyepiece WF10X

Objective rotated Zoom 1X-4X.
 Illuminator: Incident lighting & transmitted lighting

L0002

PROFESSIONAL ~ Versatile lamp. Dual light source 2 x 15 watt. Providing even white natural daylight emission remaining cool throughout. Affording comfort for the eyes during extended time at the bench. Vital for working under a natural daylight environment in a study or workshop, colours appear indoors as they actually are in daylight.

Also available in clamp mounted model **L0003**

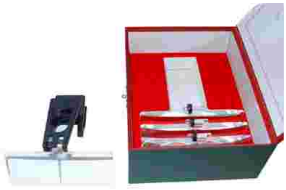

M0143

PROFESSIONAL ~ Microscope Leica 325 degree swivel base ergonomic light weight. Focus range 110mm featur LED high intensity spot for inclusion observation . Adjustable halogen illumination. Darkfield with iris 2-41mm.
